

Week 1 – What Are You Proving?

Claim:

My portfolio proves that I can build responsive and user-friendly web applications.

Audience:

Hiring managers looking for a Frontend Developer.

Action:

Invite me for an interview.

Proof:

- Responsive website projects
- HTML, CSS, JavaScript code
- GitHub repository links
- Project explanations
- Screenshots of completed work

Proof Statement:

My portfolio proves that I can build responsive and user-friendly web applications. It is designed for hiring managers looking for a Frontend Developer who can create modern, accessible, and functional websites. Through responsive website projects, HTML, CSS, JavaScript code, GitHub repositories, screenshots, and project explanations, I demonstrate my technical skills and problem-solving approach. My goal is to give hiring managers the confidence to invite me for an interview.

Why Statement:

My resume and LinkedIn can list my skills and experience, but they cannot fully demonstrate how I solve problems or build real web applications. My portfolio provides that proof through real projects and the work behind them.
